

# 2019 Sustainable Jersey Program Update

Sustainable Jersey Staff

# What is Sustainability?

**Sustainability** is most often defined as meeting the needs of the present without compromising the ability of future generations to meet theirs. It has three main pillars: social, economic, and environmental.

# Sustainable Jersey: A Framework for Action

- Coordinates priorities, resources, and policy among public and private state and local actors
- Develops **tools, resources, and guidance** to make progress
- Provides access to **grants and assistance**
- **Recognizes** accomplishments

# Why Get Involved?

- Facing real issues that must be addressed at the local level
- Why reinvent the wheel?
- Channels the energy of citizens who want action
- Shared learning

# Waste

## Municipal Challenges

- Recycling market crisis – rising recycling costs
- Waste/recycling stream contamination
- Statewide movement toward single-use plastic fees/bans

# Waste

## Innovative Solutions

- Materials Reuse
- Non-Mandated Materials
- Recycling and Waste Reduction Education and Enforcement Compliance
- Single-Use Plastics Ban

**OOPS!**

PLEASE LEAVE THESE ITEMS OUT!

 Do Not Bag Recyclables and no garbage	 No Plastic Bags (return to retail)

**Newark's Drinking Water Problem: Lead And Unreliable Filters** Rectangular Snip

August 13, 2019 - 3:21 PM ET

 SASHA INGBER

A Newark, N.J., resident carries a case of bottled water distributed Monday at a recreation center. The Environmental Protection Agency said residents shouldn't rely on water filters the city gave out to address lead contamination.  
*Kathy Wilens/AP*

Lead contamination in the drinking water in Newark, N.J., is not a new problem, but the city's fleeting solution has become newly problematic.

Officials in Newark, the state's largest city, which supplies water to some 280,000 people, began to hand out bottled water Monday.

That's because the U.S. Environmental Protection Agency has concerns about water filters that the city distributed to residents.

# Healthy – Sustainable – Equitable

*A community cannot be sustainable if it is not healthy.*

- Healthy environment: clean air, water, green spaces
- Safe neighborhoods, walking routes & places to recreate
- Inclusive social networks & local democracy
- Capacity to work together to solve problems

**Social and environmental (“upstream”) determinants of health.**

**Municipalities are on the front lines facing public health issues**

# Local Public Health Issues

## Upstream Determinants

- Aging water and stormwater infrastructure
  - Lead in service lines and plumbing
  - Combined sewers – unsanitary overflows
- Lead paint and other contaminants in homes
- Sub-standard, unaffordable housing & homelessness

# Local Public Health Issues

## Upstream Determinants

- Brownfields, toxic waste and soils
- Mental health and substance abuse
  - Opioid crisis; suicides
- Extreme weather
  - Heat events
  - More rain and severe storms
  - Emergency management challenges

Certain neighborhoods face disproportionate environmental burdens and lack access to environmental goods (green space, healthy food)

This is a question of **Environmental (in)justice**

In NJ, your **zip code** is a better predictor of your **life expectancy** than your genetic code

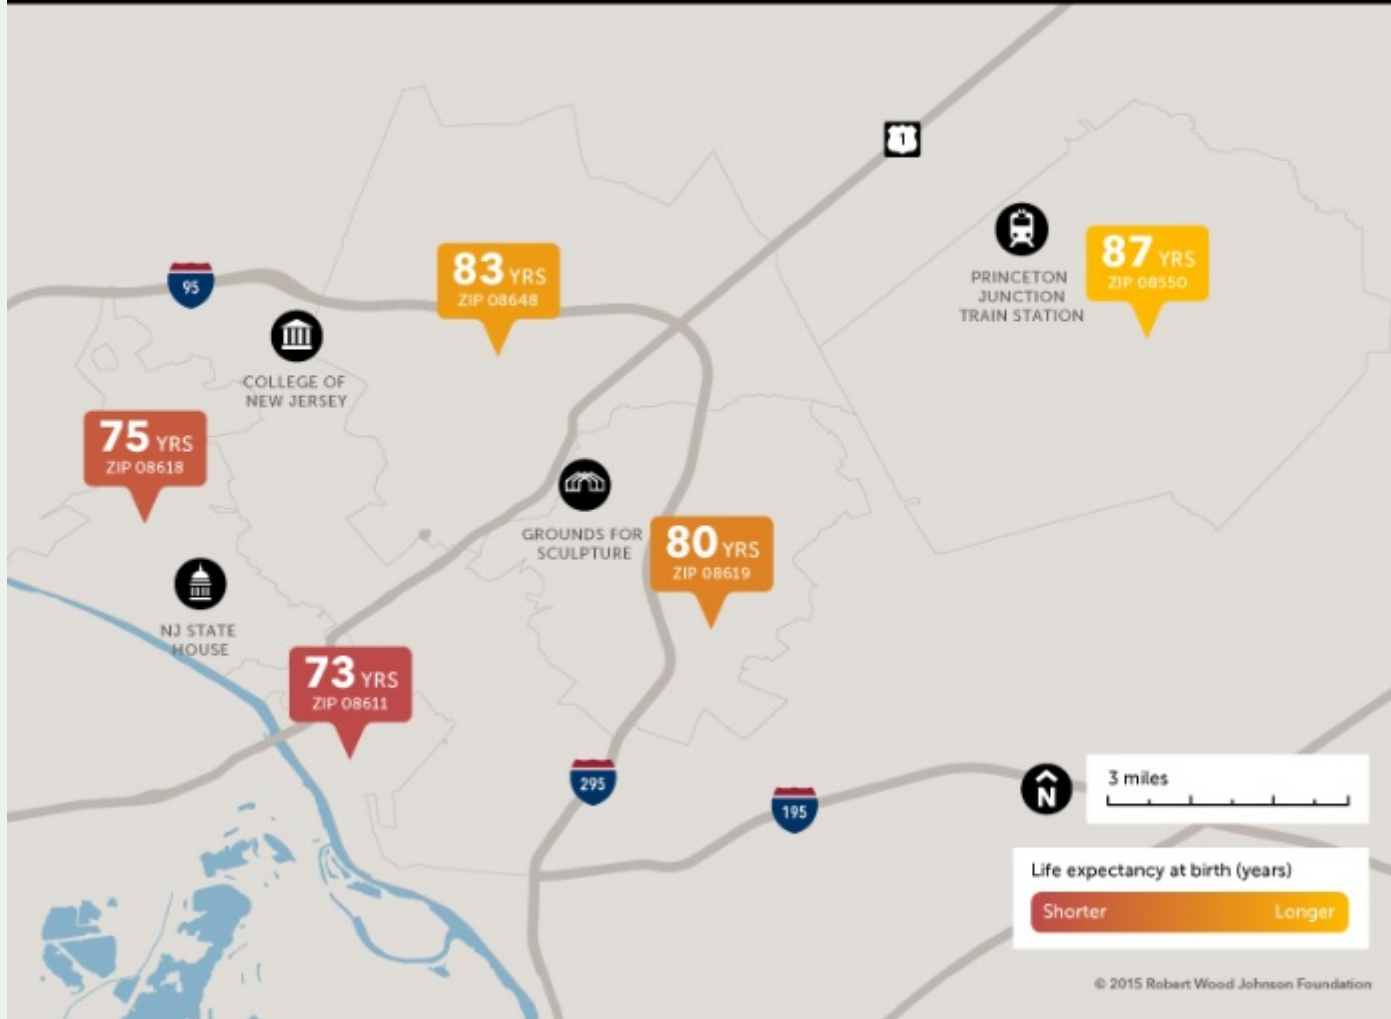

Your **race** also predicts your life expectancy and health.

TRENTON, NEW JERSEY

# Sustainable Jersey Responds...

## Goals of the **Gold Star Standard in Health\*** (under development)

- Improve social and environmental determinants
- Improve health equity
- Build a culture of health in municipalities

*\* Supported by  
Robert Wood  
Johnson Foundation*

# Sustainable Jersey Responds...

Actions to improve health in your municipality:

- Health in All Policies  
Professional  
Development
- Building Healthier  
Communities

# Sustainable Jersey Responds...

Actions that directly address health disparities:

- Environment Justice in Planning and Zoning
- Brownfields Actions
- Stormwater Management (*Water Gold*)
- Lead in Drinking Water
- Emergency Communications for Vulnerable Populations
- Complete Streets

# Revving up New Jersey's Complete & Green Streets for All

Updated May 2018

*Updates include new spotlights*

This action will recognize municipalities that create permanent household hazardous waste (HHW) collection programs for two or more materials. Listed below are the most common materials collected:

- Anti-Freeze
- Batteries
- Consumer Electronics
- Fluorescent Light Bulbs
- Paint
- Pesticides and Herbicides
- Used Motor Oil

Lists of other items considered household hazardous waste are available [here](#). Please note that prescription drugs are not covered under this action. See the [Prescription Drug Safety and Disposal](#) action to learn how to earn 10 points for a municipal prescription drug collection program.

To earn 5 points, a municipality must have collection programs in place for two designated household hazardous materials. An additional 5 points each can be earned for up to two

## Sustainable Jersey Community Certification Report

Download PDF Version

This is the Sustainable Jersey Certification Report of Hammonton Town (Atlantic), a Sustainable Jersey silver certified applicant.

Hammonton Town (Atlantic) was certified on October 10, 2016 with 355 points. Listed below is information regarding Hammonton Town (Atlantic)'s Sustainable Jersey efforts and materials associated with the applicant's certified actions.

### Contact Information

The designated Sustainable Jersey contact for Hammonton Town (Atlantic) is:

Name:	Mica McCullough
Title/Position:	Chair of Hammonton Green Committee / Hammonton Green Committee
Address:	Hammonton, NJ 08037
Phone:	931-446-3759

### Sustainability Actions Implemented

Each approved action and supporting documentation for which Hammonton Town (Atlantic) was approved for in 2016 appears below. Note: Standards for the actions below may have changed and the documentation listed may no longer satisfy requirements for that action. Additionally, points associated with actions prior to 2013 certifications may not be accurate.

### LOCAL ECONOMIES

Green Business Recognition Program 10 Points Bronze Priority Silver Priority

#### Program Summary:

Hammonton Green Committee implemented a Green Business Recognition program in 2015. Before introducing the program, we created a checklist for businesses to begin thinking about green practices that was distributed to community business through various events, including those held by the Hammonton Chamber of Commerce. After finding interest in the checklist, we created an official program that requires businesses to complete at least five actions on our list or alternative actions not included in our list but deemed green by our standards. So far, we have two local businesses signed up, but anticipate more as our partnership and promotion through the Chamber of Commerce and MainStreet organization continues.
