

# The Story of "Evesham Green"

A Community Creates a Work of Art

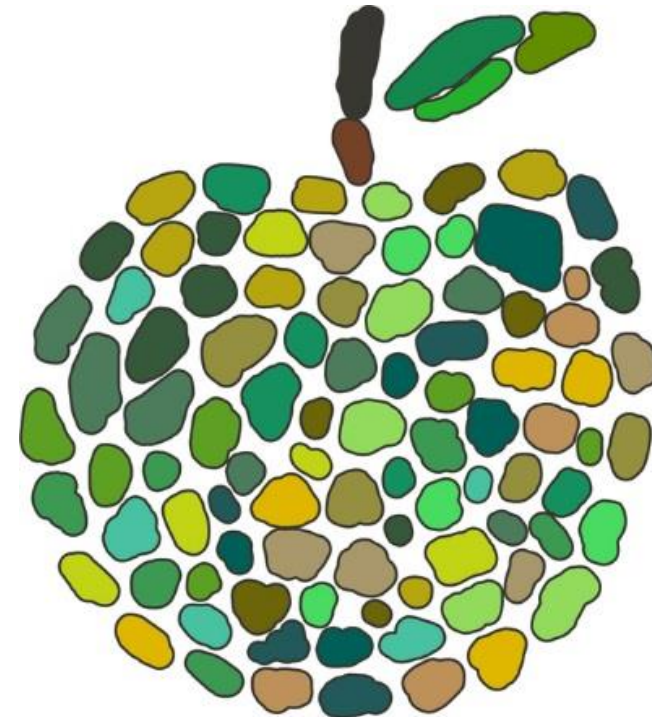

Ila Vassallo  
Evesham Green Team

# The Idea

- A sustainability-themed community mosaic
- Funded thanks to a Sustainable Jersey Small Grant

**A mosaic is a piece of art that is made up of many colorful tiles to create a beautiful picture.**

**Each tile in the mosaic contributes to the picture's beauty, but no one tile makes the picture beautiful.**

# Getting Started

- Collaborative meetings held with a local mosaic artist
- Artist recommended reaching out to local school children for inspiration for the mosaic

Imagine...  
inspiring others  
through your  
actions

Imagine... a  
community that  
treasures open  
space because  
animals, trees,  
and plants need  
homes, too

Imagine...  
everyone doing  
their part

## Letter to Students

- Solicited the help of a 3<sup>rd</sup> grade class from one of Marlton's elementary schools
- Collaborated with a teacher who involves her students in environmental awareness and sustainable practices
- A letter to the students described the mosaic project and asked them to IMAGINE...

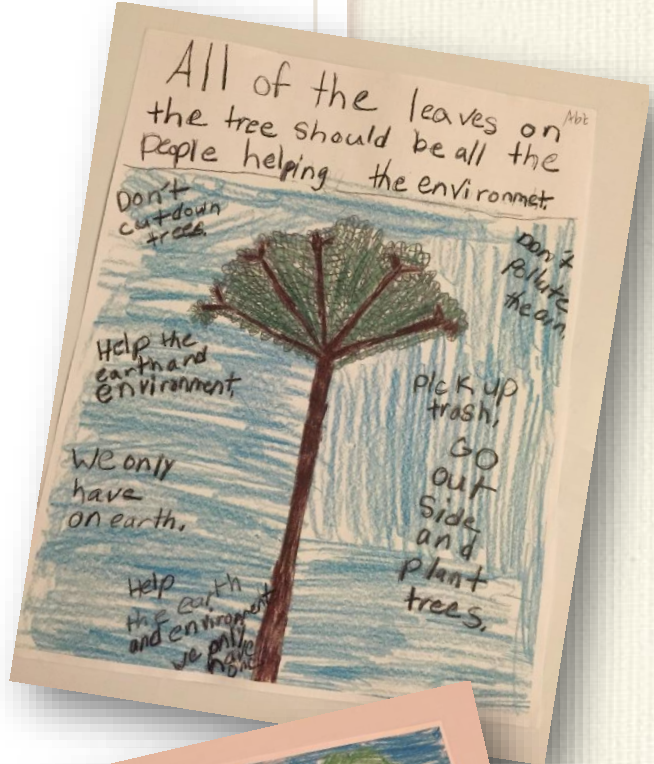

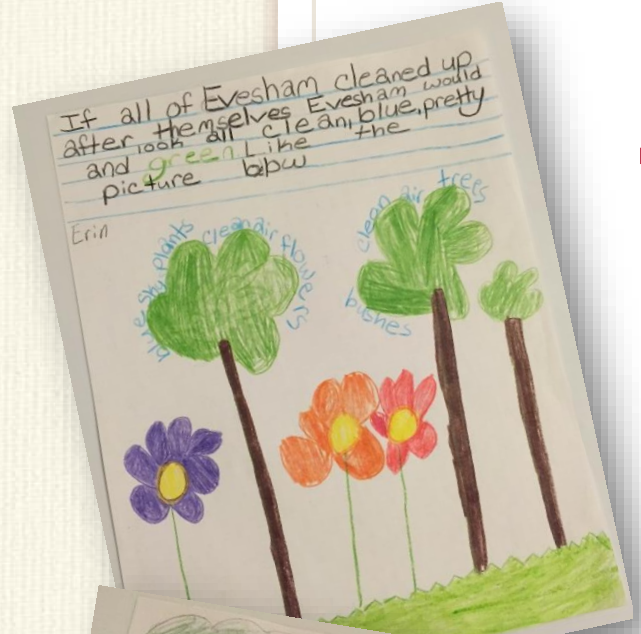

Imagine... a  
community where  
everyone reduces,  
reuses, and  
recycles

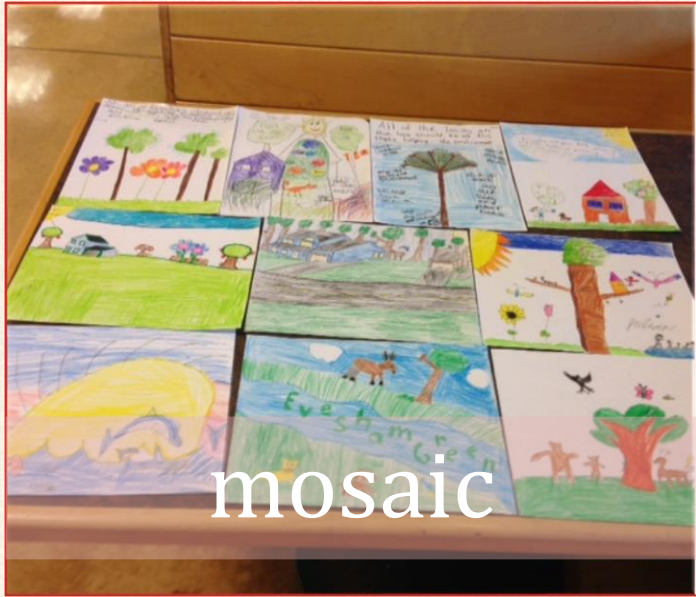

Imagine... a  
healthy planet  
today, tomorrow,  
and for a long,  
long time

Imagine... and  
turn your  
thoughts into a  
drawing

# The Inspirational Response

- A beautiful array of drawings was received from the 3<sup>rd</sup> graders

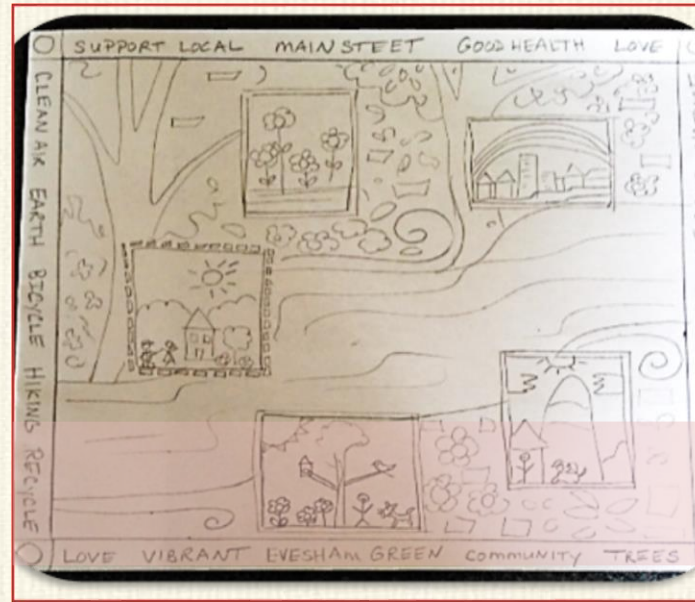

mosaic

design

elements

# “Evesham Green” comes to life with the helping hands of the community

# Celebrating community and sustainability

- Collaborative effort
- Created to celebrate the beauty of what is and what can be when a community comes together to build a sustainable hometown
- Inspired by students learning to take care of our little piece of earth in Evesham
