

Sustainable Jersey Certification Report

This is the Sustainable Jersey Certification Report of West Windsor Twp, a Sustainable Jersey silver certified applicant.

West Windsor Twp was certified on October 12, 2016 with 410 points. Listed below is information regarding West Windsor Twp's Sustainable Jersey efforts and materials associated with the applicant's certified actions.

Contact Information

The designated Sustainable Jersey contact for West Windsor Twp is:

Name:	DANIEL DOBROMILSKY
Title/Position:	LANDSCAPE ARCHITECT / COMMUNITY DEVELOPMENT
Address:	271 CLARKSVILLE ROAD WEST WINDSOR, NJ 08550
Phone:	609-799-2400 EXT. 227

Actions Implemented

Each approved action and supporting documentation for which West Windsor Twp was approved for in 2016 appears below. Note: Standards for the actions below may have changed and the documentation listed may no longer satisfy requirements for that action. Additionally, points associated with actions prior to 2013 certifications may not be accurate.

Community Partnership & Outreach

Green Team

10 Points

 Bronze Required

Program Summary: West Windsor Township Environmental Commission West Windsor Township Green Team 2016 Update A Proclamation dated Feb. 23 2016 affirming continuing support of the Green Team, signed by the Mayor and all Council members is attached. Lists of Green Team Members are attached. A Green Team Report, which was presented to the Mayor and Council

during a Council meeting on May 2, 2016, is attached. Activities Report September 2013 In the past year, West Windsor has been actively participating in the Sustainable Jersey Program and other activities. The township uses the Sustainable Jersey program to help set priorities. The Environmental Commission operates on a budget of \$12,000. In the past year, the following list illustrates some of our activities: • Executing Sustainable Jersey Program • Prepared Draft Climate Action Plan • Municipal Carbon Footprint • Community Carbon Footprint • Coordinating with other Mercer County ECs • Participating in Sustainable Jersey's Green Fleet's Task Force • Participated in ANJEC's Capital Day • Developed Riparian Ordinance • Backyard Composting Outreach • Community Education and Outreach • Outreach Campaign to Local Business Community with Rutgers Center for Green Building • Anti-Idling Program • Building Healthy Communities • Maintain Web Site • Municipal Energy Audits and Upgrade • Annual Stream Cleanup The Draft Climate Action Plan (CAP) was prepared in August 2013. The next steps are public outreach and formal adoption. We are presently auditing every government building through the Local Government Energy Audits Program. Ongoing energy use being tracked through EPA's Energy Star Portfolio Manager. An Audit Report is due Fall 2012. We have a Partnership with Rutgers Center for Green Building to implement an Energy Efficiency Targeted Marketing Program for local building owners. We prepared a Municipal Carbon Footprint and a Community Carbon Footprint. We are coordinating with other Mercer County ECs. We are participating in Sustainable Jersey's Green Fleet's Task Force. We participate in ANJEC. We developed a Riparian Ordinance for streams leading to drinking water sources. The police operate a comprehensive Anti-Idling Program. The Girls Scouts coordinate our Building Healthy Communities program. We perform an Annual Stream Cleanup with the Stony Brook Millstone Watershed Association. Environmental Commission Website www.westwindsornj.org/environ_commission.html A PowerPoint presentation on our progress is also posted on this Green Team section of the application. The report has been provided to Mayor and Council and posted on the township website, www.westwindsornj.org.

Green Fair

10 Points

Program Summary: West Windsor was a core participant in the Living Local Expo Green Fair, which was held at Rider University on March 19, 2016. West Windsor participated in weekly planning meetings that went on for several months prior to the event, placed notices on the Township website, sent out email blasts and placed lawn signs in the community. <http://www.livinglocalexpo.net/> Environmental Commission staff attended and participated in the event. Mrs. Greens, a West Windsor organic Health Food Store, was recruited by the environmental commission and also participated. Environmental Commission members were responsible for organizing the Electric Car showcase portion of the fair, where a dozen electric cars were displayed, with the owners providing information to attendees. The expo was organized by the Mercer County Sustainability Coalition, and West Windsor is on the steering committee. Approximately 900 people attended the event.

Lead Education & Outreach Programs

10 Points

Program Summary: West Windsor Township Health Department Lead Community Education and Outreach May 2016 Lead poisoning prevention education and outreach efforts are part of the ongoing public health program provided by the local health department. The Department provides environmental investigation and nursing case management to children with lead poisoning. Blood lead screening is made available at our Child Health Clinics. The case load of lead-burdened children reported across our 3 jurisdictions is limited to 1-2 cases annually. However, since lead hazards persist in the environment, an increased awareness of the issues, applicable regulations and recommended precautions to minimize lead exposure is warranted. Linking the public to reliable, accurate information and resources on lead prevention is a priority. The Department strives to make audience-appropriate materials readily available throughout the community. Outreach efforts have involved distribution of educational flyers, posters and links to existing resources. Many of the resources provided are readily available through CDC and the EPA, some have been customized. Audiences targeted include parents, home renovators/contractors, homeowners, grandparents and faith-based organizations. A variety of lead education materials have been distributed directly to residents, at child health clinics, daycares, health fairs, municipal offices and community-wide events. Materials and links have also been posted to municipal websites and distributed through email chains. National Lead Poisoning Prevention Week, October 25-31, 2015 was promoted on the Township websites and through poster distribution to help raise awareness on the issue of lead poison prevention. Linking the residents with existing resources available through partner organizations in ongoing, such as the Free Healthy Homes Assessments currently offered by Isles. This opportunity is promoted by the Public Health Nurse through a variety of channels and email chains. Future plans include partnering with the Central New Jersey Lead and Healthy Homes Coalition by hosting a Healthy Homes train-the-training program locally to increase the reach into many diverse segments of the community.

Energy

Buy Electricity From A Renewable Source

10 Points

Program Summary: West Windsor participates in Third Party Electric Supply (TPS) through the NJSEM cooperative. All West Windsor Township Municipal Electric Accounts are included in the various group bids implemented by NJSEM. West Windsor Township initiated participation through the NJSEM (New Jersey Sustainable Energy Meeting) in 2015 and continued with the 2016 bids. Gable Associates is an agent for NJSEM. Attached is the documentation for the latest bid results highlighting the 20% green energy, and a letter summarizing participation in 2015. NJSEM has indicated that NJSEM included an Enhanced Renewable Energy Product in the bid specifications and, as such, all NJSEM Members will be receiving power supply that has a 20% renewable energy component. Moreover this product has been coordinated with Sustainable Jersey ("SJ") to assure that it will qualify Sustainable Jersey members for additional SJ points under their recently-announced protocols. As such, NJSEM members will realize cost savings while promoting sustainability.

Farmers Markets

10 Points

Program Summary: 2016 Update Founded in 2004 with 8 farms and a bakery, the West Windsor Community Farmers Market will operate its 13th season starting May 7th, 2016. More information is available online: <http://www.westwindsorfarmersmarket.org/about> As a community gathering

place, a destination for foodies and a home to good food and seasonal produce, the WWCFM continues to grow and create a vibrant, welcoming place for West Windsor residents and those from surrounding communities. The range of items offered by our farmers includes organic and conventionally grown produce, fruit, alpaca and llama fiber products, beef, pork, lamb, poultry, cheeses, pies, bedding plants, flowers, honey, mushrooms, cider, pumpkins, orchids, hanging baskets and more. Our non-farm vendors' offerings include breads, natural soaps, jams, cookies, barbecue sauces and rubs, handmade ketchup and more. To eat and drink at the market, items include crepes and egg sandwiches featuring local farm fresh products, breakfast pastries, fresh fruit, veg smoothies and coffee. The Market will be open every Saturday from 9am-1pm until Saturday, November 26, 2016, at the Vaughn Drive location. This past winter the farmers market was open once per month at an indoor location, the Windsor Athletic Club, following a similar format, and with very good attendance. All involved expect this expansion of the farmer's market to the same indoor location to happen again this fall after the outdoor season ends. The farmers' market hosts a growing number of farm vendors, including Terhune Orchards, Stults Farm, Hopewell Valley Vineyards, and North Slope Organic Farm. Non-farm vendors have included Jammin' Crepes, Happy Wanderer Bakery, Terra Momo Bread Company, and Tico's Eatery and Juice Bar. Most strikingly, the Farmer's Market, while promoting the sustainable principle of buying locally and supporting local farms, partners with other community organizations to create a vibrant town center during its hours of operation. The West Windsor farmers' market was featured in a web series developed by Greener New Jersey productions. An informative video, about the farmers' market can be seen on www.greenernewjersey.org/fresh/; scroll down to "Watch the Pilot." Typically participating community groups include the University Medical Center of Princeton and the Yes We Can Food Drive to Benefit Crisis Ministry of Princeton and Trenton. The 4H club has a stand where students run a demonstration on how to compost. The Twin W First Aid Squad volunteers take blood pressure for free. A cooking demonstration may showcase the preparation of gluten-free dishes. Neighbors and friends from nearby towns stop to greet each other. Various local musician play music ranging from Broadway favorites to blue grass. The farmers' market promotes sustainability in some basic and important ways: 1. Local farms are supported; 2. Trips to distant farms are avoided; 3. Healthy living is encouraged; all in the town center where people gather.

Green Design

Green Building Policy/Resolution

5 Points

Program Summary: West Windsor Township Resolutions 2010-R134, Green Building Policy, adopted June 14, 2010

PDF: [WW GREEN BUILDING POLICY RESOL](#)

Innovative Projects

Innovative Community Project 2

10 Points

Program Summary: 2016 Update: The Commission updated the Exhibition area to feature animal resources that were important in historic and prehistoric times, many of which remain significant in the township. 2013 West Windsor Township has included an environmental education exhibition at the old Schenck Farmstead site at 70 Southfield Road. The exhibition is located in a climate-controlled room, the small artifacts room, in a newly renovated barn. The new environmental exhibition creates opportunities for visitors to have inspiring experiences that will raise awareness of environmental and conservation issues in the West Windsor area including wildlife in and around the township. It is open to the public at the same times that the historic farmhouse is open, including visitation by school groups and special holiday events. Current exhibitions feature objects that relate to the Township's agricultural heritage, with interpretation of compatibility of agriculture with the natural environment, represented by the adjacent Zaitz Woods Nature Preserve. The exhibits include local farming and food production practices, common invasive and native species, issues of polluting pesticides, and sustainability elements such as recycling. Target audiences for the exhibition are students up to fourth grade level in public and private schools, and those who are home schooled. Exhibits are to be integrated into the 4th grade public school curriculum, with conducted tours of the exhibits. Other targeted visitors include scouting groups (boys and girls). The secondary audience is local residents and their guests, and Township and Historical Society event participants. Although already open to the public, design development is on-going, with newly designed long-term and short-term exhibits already designated. These will include original woodland flora, natural predators, and water resources. In conjunction with the professional design, the New Jersey State Museum has provided lists of taxidermy mounts and other objects that can be loaned in support of changing exhibitions. Funding in the amount of \$150,000 was secured for the project. Future concept plans were most recently presented to Council in the Spring of 2013.

Green Business Recognition Program

10 Points

 Bronze Priority  Silver Priority

Program Summary: WW Twp & its Environmental Commission has created a Green Business Recognition Program to encourage local businesses to implement sustainable practices. Our Township has recognized & approved this program. We are using the updated Green Development Checklist, which lists a variety of environmentally friendly strategies, which helped us choose the businesses that qualified for the Program. These Strategies encompass the criteria established by the New Jersey Sustainable Business Registry Program. A large & small business have been chosen & will be publicly recognized for their implementation of sustainable practices which will help encourage others to follow suit. Incorporated into our marketing strategy is our Green Development Checklist, the local Chamber of Commerce, our membership in the Mercer County Sustainable Coalition, participation in our County Green Fair, & educating the business community about our Climate Action Plan. The Environmental Commission received a \$500 Sustainable Jersey Grant to implement the Green Business Recognition Program. Our Green Business Recognition Criteria and a GreenBusiness Flyer are attached. -Large business

recognized: NRG Energy for providing Princeton Healthcare System with a CHP for energy efficiency & energy self sufficiency. In addition, NRG built a state of the art corporate building powered by geothermal, CHP, solar PV & wind turbines for complete energy independence and a green roof. They provide academic scholarships & community partnerships for mentoring. Also, provide 3rd party verification of carbon reduction with a goal of 50% by 2030 & 90% by 2050. - Small business recognized: NJ Renewable Energy for educating, promoting & installing geothermal, solar PV and EV charging stations to residential & businesses.

Sustainability & Climate Planning

Municipal Carbon Footprint

10 Points

 Bronze Priority  Silver Priority

Program Summary: West Windsor Township obtained an LGEA grant to conduct an audit of its Municipal buildings. In addition, the Township contracted with Spiegle Inc, to create a Climate Action Plan (CAP). The engineers compiled current energy usage for all facilities where stationary & mobile combustion of fuels were used along with indirect emissions from consumption of purchased or acquired electricity. Our greenhouse gas inventory information was provided by the audit plus supplemental information taken from other and regional sources. Greenhouse gas inventories are based on quantifying direct and indirect emissions. When building the inventory, it was important to identify what are direct or indirect emissions, and what are totally outside the control of Township activities, and as such are excluded from the inventory. Inventory emissions

are further categorized into three broad scopes: 1: Direct GHG emissions from fuel use (gasoline, diesel, natural gas, oil, propane, etc.) 2: Indirect GHG emissions from the consumption of electricity, heat or steam 3: Indirect emissions from outsourced activities such as waste disposal, etc. The pivot year for generating a baseline inventory is 2012, which is the most recent and reasonably accurate period of documented information. The compiled inventory data reflects current and past information about population and buildings within the Township, as well as municipal, residential, commercial, and transportation energy use. Emission factors for electricity, fuel and waste are included and normalized to represent GHG emissions in units of equivalent metric tons of CO2 (eMT CO2). With this data, the Inventory generated a snapshot of baseline GHG emissions broken out by category; municipal, community, residential, commercial, transportation related, etc., and further broken down by fuel or energy source.

Waste Management

Prescription Drug Safety & Disposal

10 Points

 Bronze Priority  Silver Priority

Program Summary: The West Windsor Police Department located at 20 Municipal Drive, West Windsor, NJ has been a participant of New Jersey Division of Consumer Affairs' "Project Medicine Drop Off" since 2012. It is available 24/7, 7 days a week throughout the year. The New Jersey Division of Consumer Affairs has developed Project Medicine Drop as an important component of its effort to halt the abuse and diversion of prescription drugs. It allows consumers to dispose of unused and expired medications anonymously, seven days a week, 365 days a year, at "prescription drug drop boxes" located within the headquarters of participating police departments. The West Windsor drop box is indoors, affixed to the floor of the police station, within view of law enforcement officers and under constant video surveillance. The general public members may enter anytime to dispose of their unused medications. Their prominent "Project Medicine Drop" logos make the boxes highly visible and recognizable. This initiative builds on the success of the U.S. Drug Enforcement Administration's National Take Back Initiative, and the American Medicine Chest Challenge, which is sponsored in New Jersey by the DEA, Partnership for a Drug Free New Jersey, and Sheriffs' Association of New Jersey. Both programs provide single-day opportunities to drop off unused medications at pre-identified, secure locations. However, "Project Medicine Drop" provides the opportunity to discard unused prescription medications every day throughout the year. The West Windsor Police Department disposes of the prescription drugs by incineration and has disposed of 1300lbs of drugs since the program's inception. The Township Web Page, "Continuing Topics of Interest," includes a permanent link to a description of the Township program, including references to national programs. We are vetting several additional national program web sites to add them to this page. <http://www.westwindsornj.org/>

Community Paper Shredding Day

5 Points

Program Summary: 2016 Update: A flyer announcing the June 2016 Community Paper Shredding” opportunity as a part of the “Dumpster Day” is attached. Further documentation regarding events within the past 18 months has been requested. Due to change in personnel access to the data has been delayed. We expect to get the information within the next few weeks and will be able to upload and amend this narrative at that time if the application is opened. West Windsor Township provides its community the “Community Paper Shredding” opportunity as a part of the “Dumpster Day” event twice a year. This event is organized by the West Windsor department of the public work and the New Jersey Clean Communities Council. This event is a part of a county program. The township promotes and advertises the “Dumpster Day” event for about 2-3 weeks prior to the event day through the local TV channels, WW-P community newspaper (flyer included), WW-P municipal website and West Windsor Information Message Board on the cross section of the Clarksville Rd. and the Princeton-Hightstown Rd. On the event day, a shredding truck comes to the site and provides paper-shredding service between 10:00am and 2:00pm. The Dumpster Day event usually runs from 8:00am – 2:00pm. Items for shredding include all types of papers and Manila folders.
