### Data Methodology

1. Determined number of housing units in structures with less than four units per municipality based on US Census data (2019 American Community Survey)
2. Determined number of Home Performance with Energy Star (HPwES) and Comfort Partners (CP) projects based on NJCEP data from program inception through 2021; the number of Weatherization Assistance Program (WAP) projects based on NJDCA data (2009-2021); and the number of PSEG Whole House Projects (2009-2013). Combined these numbers to determine number of residential energy efficiency projects per municipality.
3. Divided number of projects for each municipality by number of number of units (<4) based on US Census data to get current participation rate
4. Determined 5% completed project rate based on number of housing units as per Step 1
5. Subtracted number of completed residential projects from 5% rate to identify number of projects still needed to reach 5%
